

Adapttxt Quick Start Guide

Select entire phrases with one touch

Adapttxt Advantages

One touch word or phrase entry

Dramatically speed up text entry by 35% and reduce keystrokes by 60%. Enter relevant predicted words and phrases with a single touch.

Multilingual authoring

Switch between languages in the same document. *Adapttxt* gives useful suggestions in the most relevant language. It uses the same learning and prediction performance for each language.

Use any input method

Use the intuitive interface with any input method, from soft/hard keyboards, to block or letter recognizers.

Intelligent personal dictionary

As you type, *Adapttxt* examines your language patterns using several proprietary techniques. It stores your words and their context, refining the suggestions in real-time to improve their relevance.

Convert SMS format

Adapttxt is able to expand and contract SMS format. Convert between a full vocabulary and SMS for easy sending and reading of text.

Top Tips

Learn your Files

Scan your existing documents and emails to personalise *Adapttxt* to your use of language.

You can choose to scan your documents to learn new words. My Dictionary updates instantly with new words and their context information. You can choose to learn Word (.doc), RTF (.rtf), and Text (.txt) files.

Support

Go to www.adapttxt.com and click on 'support'. You will find FAQs, a glossary and manuals.

If you have a query please click on 'submit enquiry' and 'open a new ticket'. Our technical support team can now track your enquiry and will respond promptly.

Installing Adaptxt

1. Download Adaptxt application to your PC from www.adaptxt.com/xdaorbit
2. Connect your O2 Xda Orbit to your PC using *Activesync 3.7.1* software or higher.
3. In the *Activesync* window click Explore. Now you can see a window with your mobile device folders. Copy *Adaptxt_o2.CAB* from your PC onto your O2 XDA Orbit.
4. Unplug your O2 Xda Orbit. On your Xda Orbit click Start > Programs > File Explorer. Find the *Adaptxt_o2.CAB* file. Double click on it and follow on screen instructions.
5. When prompted on storage location, chose 'device'. as Adaptxt cannot be installed on an external memory card.
6. When prompted on soft reset, choose 'yes'. This will not affect any of your device settings.
7. Adaptxt is now ready to use with any program requiring text entry

Entering Text

Using a stylus

Adaptxt can be used with any program that needs text entry e.g. Pocket Word or email.

Text entry example

- Open any application that requires text entry
- Open the Adaptxt Program
- Start > Programs > Adaptxt

The Adaptxt suggestion window is displayed. Enter a character on the soft keyboard, or using your normal text entry method, as if you were about to begin entering a word.

Adaptxt immediately makes relevant suggestions in the suggestion window. Tap a word, part phrase or phrase on the suggestion window. Your chosen word or phrase is entered into your document.

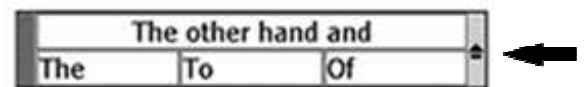

Learning Files

To personalise Adaptxt to your vocabulary or writing style more quickly, you can choose to scan in specific documents.

- Firstly, Access the Fast Menu by tapping the arrow at the right hand side of the suggestion window.

- Select Learn
- Select File

Use the Explorer window to find your .doc, .rtf, or .txt files. Any new words found are added to My Dictionary.

To quickly learn a document or email you are viewing

- Access the Adaptxt Fast Menu
- Select Learn
- Select Current Window

Convert SMS

A powerful feature of Adaptxt is the ability to convert documents between English and SMS (Short Message Service) format.

- Create your document.

To translate only a section of your document, highlight the text you wish to translate.

- Access the Fast Menu as shown above
- Select Convert
- Select **English to SMS** or **SMS to English**

The document, or highlighted text, is replaced with the converted text.
